

The Transversal Diffuser has been designed to clean/cool/dry large sizes tiles. Optimized for the use with GreenBlow, it allows to obtain an "airblade" up to 3200 mm. High versatility of use is provided by the ease of assembly and by the wide diffuser rotation. Two configurations are realized: with direct inlet and with 90 ° inlet.

When the air blade length exceeds the 1400mm, it is recommended the double inlet transversal diffuser in order to keep unchanged the performance in terms of flow and velocity output.

## Common Features

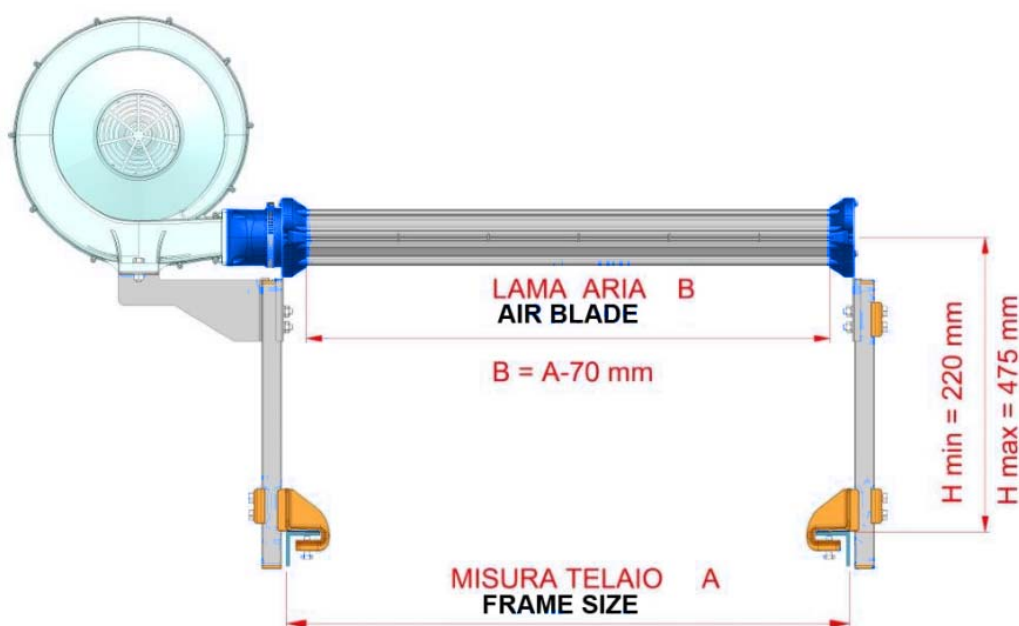

H mm.	H mm.
min. 220	max. 475

Product ID	Description	A mm.	B mm.
5010051A0800	TRANSVERSAL DIFFUSER- TYPE A WITH DIRECT INLET FRAME 800	800	730
5010051A1000	TRANSVERSAL DIFFUSER- TYPE A WITH DIRECT INLET FRAME 1000	1.000	930
5010051A1200	TRANSVERSAL DIFFUSER- TYPE A WITH DIRECT INLET FRAME 1200	1.200	1.130
5010051A1400	TRANSVERSAL DIFFUSER- TYPE A WITH DIRECT INLET FRAME 1400	1.400	1.330
